CENTRAL INTELLIGENCE AGENCY SOURCE USER Desire of Mathematician to Visit the United States PHAGE ACQUIRED (By source) PHAGE ACQUIRED (By source) Autumn 1954 THIS IS INNEVALUATED INFORMATION 1. At the Congress of the International Union of Nathematics, Soviet delegate Abdrey Mikolayevioh Kolmogoroff (or Kolmogoroff) indicated that he would like to make a trip to the United States. Kolmogoroff is a Professor of Mathematics Section of the Academy. He talked very freely and in my opinion probably represented would like the fact that the Soviets would let him go abroad undoubtedly indicates that they have confidence in him. I do not think that he is "trying to jump the barrier". I think that his words indicate that they fibe Soviets want better scientific relations and that they are villing to give their scientific relations and that they are villing to give their scientific relations and that they are villing to give their scientific relations and that they are villing to give their scientific relations and that they are villing to give their scientific relations and that they are villing to give their scientific relations and that they are villing to give their scientific relations and that they are villing to give their scientific relations and that they are villing to give their scientific relations and that they are villing to give their scientific relations on the scientific relations would welcome a visit from a scientist of Kolmogoroff's capabilities. He is a very important mathematician, I believe that if the US Government could tactfully sound out the USSR willingness to allow some mathematicians to visit here, the results would be positive. The manufact information for is Official on the possible interest of mathematics and the properties of the possible interest of mathematics and the properties of the possible interest of mathematics and properties of the possible interest of mathematics.
